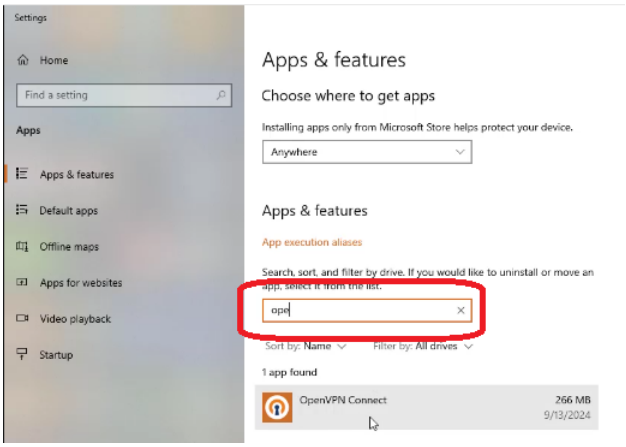
Uninstalling the Open Client VPN Software

Please note that this process will look slightly different based on the operating system of your computer.

This document will walk you through how to uninstall the Open Client VPN from your computer. To do this, follow these steps:

1) Find the “Add or Remove Programs” option on your computer. Typically, this is done by clicking on the Windows Start Menu, selecting “Settings” and then searching for “Add or Remove”.

2) The application list will open on your screen. Search for “Open” in the search bar.



3) Click on the choice for your Open Client VPN and then click **Uninstall.**
4) You will be prompted to select **Uninstall** again to confirm your request.
5) The system will then uninstall the software. Once it is complete, you will return to the application list.
